

Your year-round guide to PHCP education, including classroom, digital and mobile options.

Welcome to the second edition of our annual Manufacturers’ Training Directory. No matter if you’re an experienced professional or new to the trades, education is what sets PHCProS apart.

In the following pages, you’ll easily find the most current product education available across the plumbing, piping, HVAC and hydronics sectors, along with key contacts and an overview of the types of training offered by leading manufacturers.

Whether you want to book a classroom session; log on to a digital on-demand module or head out to see a mobile training truck making a local stop, you’ll find all the information you need.
